## **10. MARKET MAKING**

No collateral of any kind will be made available in respect of the SDs. Société Générale will act as market maker in respect of the SDs. During regular market hours and under normal market conditions the Issuer will provide a secondary market and ensure liquidity for 100 SDs. Société Générale will not act as market maker in situations where it considers that the current market price of the SD is less than the minimum tick size of the SAXESS trading system of the Helsinki Stock Exchange.

Market making will cease on the last trading day at 6:25 pm. However, as a result of an Early Expiration Event, market making in respect of said SD will cease immediately.

Société Générale reserves the right to modify the time that market making ceases on the last trading day, should there be any subsequent changes to the time relating to the determination of the price of the relevant underlying asset of the SD. The warrant holders will be notified of changes in the market making no later than one week before said changes enter into force.

In order to ensure sufficient liquidity, Société Générale will maintain a maximum bid/offer spread, being the greater of EUR 0.05 or 5 % of the offer price of the SD. The bid/offer spread represents the difference in price at which any investor can sell and buy SDs on the Helsinki Stock Exchange. When the Index is not quoted during regular market hours on the Helsinki Stock Exchange, Société Générale shall determine the bid and offer prices to be given in market making based on index futures quoted on the Eurex Frankfurt stock exchange. Société Générale reserves the right to define the value of variables relating to the above bid/offer spread.
